RE: Jeff Nelson (10/10/1980, MR#: AB12345)

Date of Procedure: August 24, 2011

Dear Dr. Physician,

We had the pleasure of seeing your patient, Jeff Nelson, for Excisional surgery. As you recall, he is a very pleasant 30 year-old male with the following lesion(s):

Basal Cell CA - Left Dorsal 1st Finger (0.0 x 0.0 cm).

The tumor was removed with the Excisional surgery. The resulting defect measured 0.6 x 1.2 cm. The wound was closed with an Intermediate Linear Closure.

The patient left the unit in good medical condition and was asked to see us for suture removal on Saturday, November 12, 2011.

Basal Cell CA - Left 1st Finger Nail Unit (0.0 x 0.0 cm).

The tumor was removed with the Excisional surgery. The resulting defect measured 0.6 x 0.8 cm. The wound was closed with a Simple Linear Closure.

The patient left the unit in good medical condition and was asked to see us for suture removal on Saturday, November 12, 2011.

Thank you for referring Mr. Nelson and allowing us to participate in his care. If you have any questions or if we can be of further assistance, please contact us.

With warm regards,

John Gibosn
